A family business with more than 100 years of experience

Across Europe, the STOCKMEIER Group is standing for the reliable supply of products and raw materials for a wide range of applications. With this aim in mind, we have evolved from a regional trading company into an international group with more than 2,000 employees.

Nowadays, the STOCKMEIER Group includes companies offering distribution, production and services for diverse industries. In Europe and the USA, we develop and distribute raw materials for personal care. In all areas, our customers can rely on tailor-made solutions and services.

Despite this diversification and strong growth, STOCKMEIER is still a family-owned company from Westphalia, strongly based in Germany and Europe. The distribution of various products and raw materials has been always an important part of our business.

Family-owned business

Value orientation

We stand for strong connections

STOCKMEIER Química, aims to create business value and total customer satisfaction.

At Stockmeier Química we commercialize a wide portfolio of chemical products, from commodities to specialties, for all industrial sectors, especially in personal care, paints and varnishes, water treatment, food, detergents and pharma.

Our core business is based on a strong relationship with the main manufacturers and a wide range of services to our customers:

- Logistics service
- Formulation of blends
- Storage
- Blending Packaging
- Technical Consulting
- Chemical analysis

We have the confidence and recognition of the chemical sector that allows us a sustained growth over the years, covering the entire Iberian market and the Maghreb area.

Especially for the **Personal Care** industry, we offer a wide range of excellent raw materials. Through reliable quality and individual advice, we provide you with tailor-made solutions for your application. For this purpose, a competent team of application technicians and commercial staff is at your disposal.

Our experienced technicians have in-depth knowledge of the industry and will also be happy to advise you individually on site

Cleaning Solutions

- Food & Feed Cleaners
- Surface Treatment
- Hot-Dip Galvanizing
- Tank Cleaning

Active Ingredients

TRADE NAME	INCI	CAS No.	FEATURES
Alpha Bisabolol nat. 	Bisabolol	23089-26-1	- A 100% natural product sustainably obtained from Candeia trees - Anti-inflammatory properties - Stimulates wound healing - Anti-bacterial activity
Aprisoft Aloe Vera FD 200:1	Aloe Barbadensis Leaf Juice	85507-69-3 / 94349-62-9	- A 100% natural product sustainably cultivated and processed. - IASC certified. - Anti-bacterial and anti-inflammatory properties - High moisturizing properties
D-Panthenol 75% W	Panthenol, Aqua	81-13-0	- Stimulates wound healing - Excellent moisturizing and hydrating properties - Prevents hair damage
Niacinamide EP	Niacinamide	98-92-0	- Active form of Vitamin B3 - Regulates the activity of the sebaceous glands - Reduces and prevents signs of hyperpigmentation - Protects the skin from UV irradiation damages
Urea Prills cosmetic grade	Urea	57-13-6	- Enhances the skin barrier function - Moisturizes the skin deeply - Releases dead skin cells (exfoliation effect) - Reduces itching and local pain of the skin
Vitamin E Acetate / DL-alpha Tocopheryl Acetate	Tocopheryl Acetate	7695-91-2	- Stable form of Vitamin E - Antioxidant, helps fight free radical damage - Promotes skin healing

Emollients

TRADE NAME	INCI	CAS No.	FEATURES
Aprisoft EHP 	Ethylhexyl Palmitate	29806-73-3	- Improves the texture and sensory feel of formulations - Reduces the appearance of dry flaky skin - Non-occlusive emollient, natural alternative to silicones
Aprisoft EHS 	Ethylhexyl Stearate	91031-48-0	- Provides a soft and smooth appearance to the skin - Prevents water loss in the skin - Non-occlusive emollient with good spreading properties
Aprisoft IPM	Isopropyl Myristate	110-27-0	- Enhances texture of the formula - Excellent moisture-locking abilities - Supports penetration of other ingredients into the skin
Aprisoft IPP 	Isopropyl Palmitate	142-91-6	- A clear and colorless ingredient with a pleasant odor, fast spreading emollient that helps to soothe and soften the skin. - It improves the texture of the skin and reduces the appearance of fine lines and wrinkles - For hair care formulations, it helps to improve the texture and manageability of hair. - It can help to smooth the cuticle and reduce frizz.
Aprisoft MCT 60/40 	Caprylic/Capric Triglyceride	65381-09-1 or 73398-61-5	- Emollient with good dermatological properties, hydrotrope for fat-soluble additives, known as neutral or MCT oil. - C-chain ratio of the main components C8:C10 approx. 60/40.
Aprisoft SQO 	Squalane	111-01-3	- 100% naturally derived from Olive Oil - Provides skin care formulations a non-greasy touch - Prevents moisture loss of the skin

The products marked with  conform to COSMOS

The products marked with  conform to NaTrue

Emulsifiers

TRADE NAME	INCI	CAS No.	FEATURES
Aprina SA/92 	Stearic Acid	57-11-4	- Retains effectively the skin's natural moisture - Contains powerful skin-calming properties - Natural cleanser and stabilizer
Glyceryl Monostearate SE / NSE 	Glyceryl Stearate	31566-31-1	- PEG-free O/W co-emulsifier - Prevents moisture loss of the skin - Improves the texture and feel of the formulation

Vegetable Oils & Butters

TRADE NAME	INCI	CAS No.	FEATURES
Avocado Oil  	Persea Gratissima Oil	8024-32-6	- Gentle moisturizer, nourishes skin, scalp and hair. - Said to stimulate collagen production, relieve inflammation and is used to protect the skin from drying winds
Argan Oil  	Argania Spinosa Kernel Oil	223747-87-3 / 299184-75-1	- It helps to restore the skin's hydrolipidic film, strengthens the skin barrier and limits water loss, because of its essential fatty acid content (omega-6 and -9). - To hair it brings shine and suppleness for dry and fragile hair. - Its vitamin E and healthy unsaturated fats make it a useful addition to dietary supplements (e.g. capsules), promoting overall well-being.
Joboba Oil  	Simmondsia Chinensis Seed Oil	90045-98-0	- Versatile natural oil for both skin and hair. - Rich in beauty-boosting vitamins A, E, and D, antioxidants and fatty acids, jojoba oil is actually a wax ester with remarkably similar properties to skin's own sebum. - Very stable oil with rather long shelf life for a natural oil. - Results in very white creams and lotions.
Shea Butter  	Butyrospermum Parkii Butter	91080-23-8	- Exotic, waxy emollient with slow spreadability - High content of unsaponifiable - For all skin care products.

UV Filters

TRADE NAME	INCI	CAS No.	FEATURES
Aprisun BMDDBM	Butyl Methoxydibenzoylmethane	70356-09-1	- Very strong and efficient UVA absorber, oil soluble, also known as Avobenzone. - BMDDBM requires complete dissolution and stabilization.
Aprisun EHS	Ethylhexyl Salicylate	118-60-5	- An effective oil soluble liquid UVB filter. - It is an excellent solubilizer for crystalline UV filters, such as BMDDBM and EHT.
Aprisun EHT	Ethylhexyl Triazone	88122-99-0	- A highly effective oil soluble UVB filter with an excellent photostability
Aprisun ZD M70  	Zinc Oxide, Caprylic/Capric Triglyceride, Polyhydroxy Stearic Acid	1314-13-2, 73398-61-5, 58128-22-6	- A dispersion of uncoated Zinc Oxide in Caprylic/Capric Triglyceride and Polyhydroxy Stearic Acid that offers protection against both UVA and UVB rays. - Enhances spreadability of the finished product with less whitening effect on the skin.

Performance Ingredients

Actives

TRADE NAME	DESCRIPTION
ALINA® LST by ALINA Care Components	- An upcycled extract from larch bark with anti-oxidative properties, increases the formation and enhancement of collagen fibers. - Excellent anti-inflammatory and anti-bacterial activity, stimulates wound healing.
ALINA® MATE  by ALINA Care Components	- A powerful active complex based on Mate Tea extract that combats effectively the anti-oxidative stress of the skin. - NaTrue certified thus ideal for natural certified cosmetic.
SEA UVARIÑO® by Caroi'Line	- An effective antioxidant based on Grape Sea extract, rich in polyphenols, with high anti-bacterial and free radical scavenging activity.

Conditioners

TRADE NAME	DESCRIPTION
Texique® CS-P by Scott Bader	- An easy-to-use modified film forming cationic starch derivative, produced from food grade potato starch, ideal for all Hair Care formulations. - Provides excellent detangling, improved combing on wet and dry hair, increase in hair shine, helping to moisturize and improve manageability.
Texique® CS-32 by Scott Bader	- An aqueous solution of a naturally derived cationic polysaccharide produced from food grade potato starch, ideal for all Hair Care formulations. - It leaves hair soft with a natural feeling and is especially suited for finer hair types. - It provides excellent detangling, improved combing on wet and dry hair, helping to moisturize and improve manageability.

Emollients

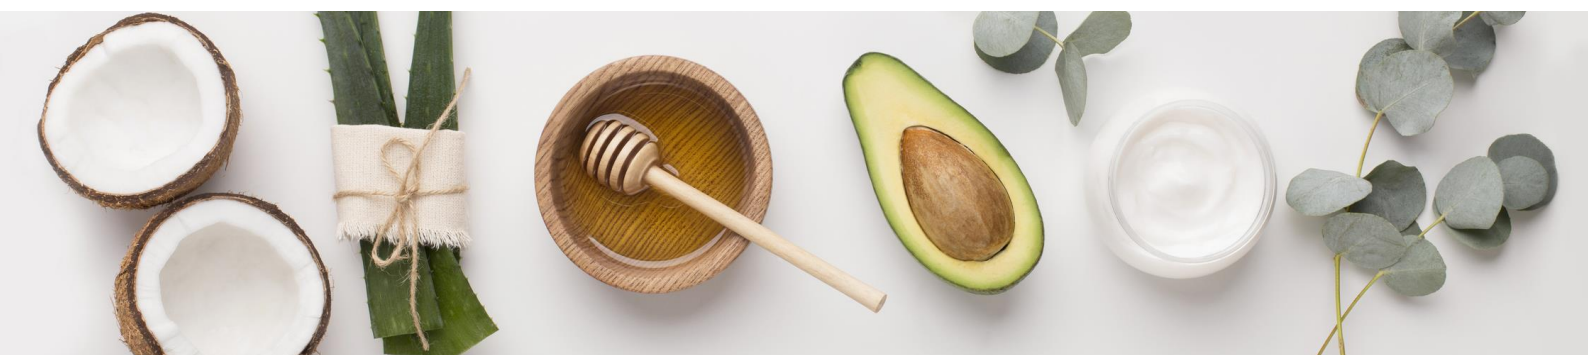

TRADE NAME	DESCRIPTION
EXOSIL® by Caroi'Line	- An upcycled olive oil based, soft, non-greasy emollient, as ideal replacement for all mineral oil-based silicones. - Specially recommended for Hair Care formulations due to its excellent conditioning properties.
Texique® Lux5 by Scott Bader	- A quick spreading light emollient for personal care applications, that provides many of the sensory properties of low viscosity silicones. - Helps to disperse many commonly used organic UV filters, and aids with dispersion of pigments in colour cosmetics leading to smoother application and lighter skin feel. - In Hair Care applications it provides anti-frizz benefits to the formulations.

Preservatives

TRADE NAME	DESCRIPTION
ALINA® NK  by ALINA Care Components	- A natural strong preservative complex containing Rosmarinic Acid, Arginine and other powerful preservative ingredients. - NaTrue certified thus ideal for natural certified cosmetic.

Antioxidants

TRADE NAME	INCI	CAS No.	FEATURES
Vitamin C USP / Ascorbic Acid	Ascorbic Acid	50-81-7	- Is a powerful antioxidant, neutralizes free radicals and protects the skin from environmental damage. - Collagen booster: Enhances skin firmness and elasticity. - Brightening agent: Reduces dark spots and evens skin tone. - Mild exfoliant: Promotes cellular renewal.

Humectants

TRADE NAME	INCI	CAS No.	FEATURES
Glycerin veg., 99,5%	Glycerin	56-81-5	- Fortifies and strengthens skin's moisture barrier - Suitable for all skin types: Soothes sensitive skin, relieves dryness, does not clog pores
Sorbitol	Sorbitol	50-70-4	- A good moisturizing agent that retains water, keeping the skin hydrated. - In Oral Care applications it contributes to a refreshing mouthfeel, complementing minty flavor while preventing toothpaste from drying out.

Preservatives

TRADE NAME	INCI	CAS No.	FEATURES
Citric Acid Monohydrate	Citric Acid	5949-29-1	- A naturally occurring organic acid commonly used in cosmetic and personal care products for its pH-adjusting and exfoliating properties. - Stabilizes formulations by chelating metal ions that can cause oxidation. - Derived from citrus fruits, it is versatile and widely accepted in both conventional and natural formulations.
Phenoxyethanol	Phenoxyethanol	122-99-6	- A versatile glycol ether commonly used as a preservative in cosmetic and personal care products due to its antimicrobial properties and broad compatibility with other ingredients.

Surfactants

TRADE NAME	INCI	CAS No.	FEATURES
Apriglu 814 (Decyl Glucoside)	Decyl Glucoside	68515-73-1 & 110615-47-9	- A plant-based mild non-ionic surfactant that is used as a foaming, cleansing, conditioning or emulsifying agent. - It has excellent foaming capacity and good dermatological compatibility. In hair care preparations, it helps removing buildup without stripping hair of color or natural oils.
Betaine	Cocamidopropyl Betaine	61789-40-0	- An amphoteric surfactant derived from coconut oil and dimethylaminopropylamine, widely used in personal care products for its mildness and ability to enhance foam and cleans effectively. - Reduces electrostatic charges on the hair and improves rheological behavior of the formulation.
Cocamide DEA	Cocamide DEA	68155-07-7	- A non-ionic surfactant and foam booster derived from coconut oil that improves cleaning performance without being overly harsh on skin or hair. - Good viscosity builder and emulsifier.
Lauramine Oxide	Lauramine Oxide	1643-20-5	- An amphoteric surfactant, known for its versatility and mildness in personal care formulations, suitable for sensitive skin and scalp. - It has antistatic properties. Leaves hair easy to comb, soft and shiny and / or confers volume, lightness and shine.
Sodium C14-16 Olefin Sulfonate	Sodium C14-16 Olefin Sulfonate	68439-57-6	- A mild high-performance anionic surfactant, widely used in personal care products for its excellent cleansing and foaming properties.
