

KAPPAWET BOS NEW

Low-foaming wetting agent and detergent

Chemical composition	preparation of fatty alcohol ethoxylates
Appearance	colourless, clear liquid
pH-value 20 °C	7 - 9 (1 %)
Density 20 °C (g/ml)	approx. 1.0
Ionic charge	nonionic

Function

KAPPAWET BOS NEW has been developed especially for the pre-treatment. It is an excellent low-foaming wetting agent and detergent with a strongly emulsifying effect towards oils, fats and waxes.

KAPPAWET BOS NEW is an agent for all types of fibres. Its use in peroxide bleaching results in improved absorbency and increased whiteness. The product can be easily rinsed off.

KAPPAWET BOS NEW is resistant to oxidising and reducing agents, water hardness, acids up to pH 2 and alkali up to 150 ml/l NaOH 38 °Bé.

Application

KAPPAWET BOS NEW can be applied without pre-dilution directly into the washing or bleaching liquor. The application levels depend on the goods to be treated and the grade of contamination.

Recommended application level

	KAPPAWET BOS NEW
in long liquor (winch, jet)	0.5 - 1.0 g/l
in short liquor (jig)	1.0 - 2.0 g/l
in padding liquors	3.0 - 10.0 g/l

Dilution instruction

KAPPAWET BOS NEW can be added directly to the liquor.

Storage

KAPPAWET BOS NEW remains stable for at least 1 year if stored properly and cool in a tightly closed container.
