

KAPPACID BSP

Biodegradable buffer solution to adjust pH of treatment liquors, especially for biofinish

Chemical composition	preparation of organic acids and salts
Appearance	colourless to slightly yellowish liquid
pH-value 20 °C	5.0 – 5.4 (product)
Density 20 °C (g/ml)	approx. 1.33

Function

KAPPACID BSP is a buffer solution for pH adjustment of treatment liquors, especially for biofinish with acidic cellulases or for softener baths. The buffer performs in a range of pH-value 4 – 7.

KAPPACID BSP is biodegradable and also suitable for pH adjustment according to Ökotex Standard 100.

Application

Recommended application level depending on the ratio of water and present bases or acids:

- 1 – 3 g/l KAPPACID BSP

Appropriate preliminary trials are recommended

Dilution instruction

KAPPACID BSP is soluble in cold and hot water, but can also easily be added directly to the liquor.

Storage

KAPPACID BSP remains stable for at least 5 years when stored properly in a tightly closed original container.
