

KAPPALINK CAT 94

Catalyst for resin finishing

Chemical composition	mixture of zinc salts
Appearance	colourless, clear liquid
pH-value 20 °C	< 1 (product)
Density 20 °C (g/ml)	approx. 1.55

Function

KAPPALINK CAT 94 is a highly efficient additive for catalysing

- reactive crosslinkers and
- melamine resins.

KAPPALINK CAT 94 can also be used in combination with water and oil repellent products.

Application

Recommended application level, depending on the amount of crosslinkers or melamine resins:

- 1 – 10 % KAPPALINK CAT 94

KAPPALINK CAT 94 should always be added to the finishing liquor shortly before application, as the durability of the liquor is limited after the catalyst has been added.

Dilution instruction

KAPPALINK CAT 94 can be diluted with cold water.

Storage

KAPPALINK CAT 94 remains stable for at least 1 year if stored properly in a tightly closed original container.
