

KAPPASOFT MAS

Permanent softener

Chemical composition	macroemulsion based on aminosilicones
Appearance	white liquid
pH-value 20 °C	approx. 6 (10 %)
Concentration	approx. 40 %
Ionic charge	nonionic

Function

KAPPASOFT MAS is a permanent softener for woven and knitted fabrics made of all type of fibres and their blends. Besides an excellent softness of the surface, KAPPASOFT MAS can also achieve softness in the “core”.

KAPPASOFT MAS has a high yellowing resistance and causes a deepening of color.

Application

KAPPASOFT MAS should be applied in the padding process, if possible.

Recommended application level:

- 10 – 30 g/l KAPPASOFT MAS
- 1 g/l acetic acid (60 %)
- pH-value: approx. 5
- Drying at: 110 – 130 °C

Dilution instruction

KAPPASOFT MAS can be diluted with water at any ratio.

Storage

KAPPASOFT MAS remains stable for at least 6 months if stored properly in a tightly closed container.

Do not expose to frost!
