KAPPASOAP R 41 conc.
Soaping agent

CHEMICAL-PHYSICAL DATA
Chemical composition: preparation of polyacrylates and alkyl phosphonates
Appearance: yellowish, nearly clear solution
pH-value 20 °C (product): 4 - 6
Density 20 °C (g/ml): approx. 1.19
Ionic charge: anionic

FUNCTION
KAPPASOAP R 41 conc. is the concentrated version of KAPPASOAP R 41. The product must be diluted with half quantity of water to get KAPPASOAP R 41.

KAPPASOAP R 41 conc. is an excellent soaping agent.

KAPPASOAP R 41 conc. has an excellent dispersing effect and is an efficient sequestering agent for alkaline earth and heavy metal ions. At pH 11 and 60 °C, 1 g of KAPPASOAP R 41 conc. binds approx. 180 mg of CaO or approx. 320 mg of CaCO₃. The formed complexes are very stable even at boiling temperature and in a stronger alkaline range (to approx. 3 g/l NaOH 100 %).

KAPPASOAP R 41 conc. does not cause any demetallization of direct and reactive dyes based on metallic complexes in spite of its strongly developed chelating capacity.

KAPPASOAP R 41 conc. is not interfacial-active and therefore foam-free.

APPLICATION
KAPPASOAP R 41 conc. is a very universally applicable product, e. g.
- for dyeing of cellulosic fibres or cellulosic fibre blends with direct, reactive, vat and sulfur dyes, whereas it is possible to dye raw cotton without preliminary cleaning for example.
- for printing with reactive dyes when applying alginate thickening agents.
- for all scouring, washing and soaping processes in neutral and alkaline range.

The application level depends on the respective operating conditions. Recommended application level for long liquors:

| approx. 0.05 ml/l | KAPPASOAP R 41 conc. |

Relating to the sequestering of water hardness, approx. 0.05 ml KAPPASOAP R 41 conc. is required per 1 °dH and 1 litre of water.

DILUTION INSTRUCTION
KAPPASOAP R 41 conc. can be diluted with cold water at any ratio. The product can also be added directly to the liquor.

STORAGE
KAPPASOAP R 41 conc. remains stable for at least 1 year if stored properly and cool in a tightly closed container.
