KAPPAVON LD 360
Levelling and dispersing agent

CHEMICAL-PHYSICAL DATA
Chemical composition: modified naphtalinsulfonate (Na-salt)
Appearance: light brown liquid
pH-value 20 °C (product): approx. 9.2
Density 20 °C (g/ml): approx. 1.17
Ionic charge: anionic

FUNCTION
KAPPAVON LD 360 is an universally applicable dispersing agent with levelling properties for dyeing of cotton, wool, polyester and polyamide as well as their blends.

It is used as dispersing agent for dyeing with dispersion, vat, anthrasol and napthole AS dyestuffs.

Due to the affinity to animal fibres and polyamide, KAPPAVON LD 360 is also used for compensation of affinity differences when dyeing such fibres.

KAPPAVON LD 360
- is resistant to high temperature.
- has not retarding effect on dyestuffs.
- is comparatively foam-free.
