KAPPAWET TOP
Low-foaming wetting agent and detergent

CHEMICAL-PHYSICAL DATA

Chemical composition: preparation of fatty alcohol ethoxylates
Appearance: colourless, clear liquid
pH-value 20 °C (product): 6 – 7
Density 20 °C (g/ml): approx. 1.0
Ionic charge: nonionic

FUNCTION

KAPPAWET TOP has been developed especially for the pre-treatment. It is an excellent low-foaming wetting agent and detergent with a strongly emulsifying effect towards oils, fats and waxes.

KAPPAWET TOP is an agent for all types of fibres. Its use in peroxide bleaching results in improved absorbency and increased whiteness.

The product can be easily rinsed off.

KAPPAWET TOP is resistant to oxidising and reducing agents, water hardness, acids up to pH 2 and alkali up to 150 ml/l NaOH 38 °Bé.

APPLICATION

KAPPAWET TOP can be applied without pre-dilution directly into the washing or bleaching liquor. The application levels depend on the goods to be treated and the grade of contamination.

<table>
<thead>
<tr>
<th>KAPPAWET TOP</th>
</tr>
</thead>
<tbody>
<tr>
<td>in long liquor (winch, jet) 0.5 – 1.0 g/l</td>
</tr>
<tr>
<td>in short liquor (jig) 1.0 – 2.0 g/l</td>
</tr>
<tr>
<td>in padding liquors 3.0 – 10.0 g/l</td>
</tr>
</tbody>
</table>

DILUTION INSTRUCTION

KAPPAWET TOP can be added directly to the liquor.

STORAGE

KAPPAWET TOP remains stable for at least 1 year if stored properly and cool in a tightly closed container.
