

STOCKMEIER
CLEANING
SOLUTIONS

One-Stop Shop for Tank Cleaning.

Comprehensive solutions for tank cleaning.

Cleanliness along the whole line

In the industrial sector, it is essential to ensure the best cleaning results with minimum downtimes. This is exactly what we guarantee with our solutions for tankers, tank wagons, containers and IBCs.

Loose goods such as food, animal feed, chemicals and oil are mainly transported in tankers. The variety of product residues that need to be cleaned makes the cleaning and disinfection of tankers a particular challenge.

No matter the cleaning class or whether you use hot water, cold water, or steam: Our application engineers will be happy to advise you on how to reduce your raw material consumption and optimise your energy management using our cleaning agents and product concepts.

STOCKMEIER – In a Nutshell

The specialist application engineers at STOCKMEIER Cleaning Solutions analyse the entire process and work with you to develop tailor-made, comprehensive solutions. They are always available to provide you with expert advice. Here, there is a consistent focus on excellent cleaning results, cost-effectiveness, efficiency, sustainability, and care for the environment.

The Surface Technology department boasts many years of experience and in-depth expertise in industrial cleaning. A key focus is tanker cleaning with its wide range of applications.

Products and processes for cleaning and disinfection are continuously refined—practical, high-performance, and precisely tailored to specific requirements.

The Research and Development department drives innovation in a targeted manner. Many solutions are developed in close collaboration with customers and are tailored precisely to their requirements.

Sustainable products and applications

Sustainability reports
Reports for the STOCKMEIER Group since 2019.

Carbon accounting
according to the
GHG protocol.

ISO 14001-certified sustainable practices
Certified companies are characterised by the detailed documentation of all KPIs.

EcoVadis program
A program for sustainable supply chains.

Sustainable products
More than 50 products hold recognised eco-label certifications.

Cleaning Agents for the Chemicals Industry

LateX, dispersion, and resin cleaners / circulation cleaners

Effective, highly specialised multifunctional products that were specifically developed for their respective application areas following comprehensive, practical testing and have proven themselves to this day. For example, for residues such as latex, resins, dispersions, polyols, paraffins, additives, as well as polymers and isocyanates.

Alkaline multifunctional cleaners for stubborn residues	
Leraclen® ALE	Removes resins, latex, and dispersions; suitable for circulation cleaning
Leraclen® Circuit Cleaner	Circulation cleaner, new formulation, removes resins, latex, and dispersions
Leraclen® DL 512	Removes resins, latex, dispersions, and adhesive residues—odor-free, suitable for circulation cleaning systems
Leraclen® Additive Remover	Removes heavy additives, gear oils, and highly adhesive products; suitable for silo trucks
Leraclen® HLDA	Removes organic, sticky, and resinous residues such as latex residues, glues, and synthetic resin dispersions
Lerasolv® Multisolve	Hydrocarbon-based circulation cleaner
Leraclen® Polysolve	Paint stripper, circulation cleaner

Alkaline cleaning agents for light products, etc., such as oils, fatty acids, etc.	
Leraclen® HD 340	Universal cleaner for the chemical and food industries, silo trucks
Lerapur® T 283	Highly alkaline basic cleaner—reliably removes oils, palm oils, rapeseed oils, and fatty acids
Leraclen® KIS	Strongly alkaline, sprinklable powder product—can be used as a booster for silo trucks
Leraclen® Tank Alkaline	Basic cleaner for the chemical and food industries, foaming, silo trucks

Solvent-based cleaners	
Stobi® Clean 65	Cold cleaner based on hydrocarbons; removes, for example, additives, resins, paraffins, and oils—suitable for manual application as well as spray-in methods
Lerasolv® 154	Solvent-based cleaner with low labeling
Lerasolv® Resin Remover	Low-level, surfactant-containing solvent cleaner (often used as a booster)

Acidic cleaning agents	
Leraclen® Acid Plus P	Phosphoric acid-based cleaning agents for cleaning the interior of tanks and for adding shine to the exterior of silo trucks
Leraclen® Acid Plus S	Mineral acid-based, surfactant-enhanced cleaner – suitable for both interior and exterior cleaning
GlossTec® Truck Acid plus	Mineral acid-based, surfactant-enhanced cleaning product for cost-effective interior and exterior cleaning
Leracid® Tank Acid	Universal phosphoric acid-based cleaner for interior and exterior cleaning

Cleaning Agents for the Food Industry

Minimum requirements for cleanability in the food industry

The food industry is subject to the highest standards of hygiene, safety, and process stability. Tank interior cleaning is a key component of this process, helping to prevent contamination and ensure consistently high product quality.

Proper and regular cleaning of air and hose lines, as well as the entire plant periphery, is crucial for a safe and reliable transport and supply chain. This also includes areas such as cleaning systems, technical equipment, and water storage tanks.

We provide practical support to ensure maximum operational safety and trust throughout the entire supply chain.

Alkaline cleaning agents – food industry	
Leraclen® HD 340	Universal cleaner—quickly and efficiently removes fatty acids, oils, juices, beverages, as well as milk, chocolate, and cocoa mass; silo trucks
Lerapur® 22	Lye-free, alkaline specialty cleaner removes sticky residues such as vitamin C, chocolate, carotene, glucose, starch, whey, and fructose; silo trucks
Leraclen® Tank Alkaline	Foaming basic cleaner for the food industry
Lerapur® T 283	Highly alkaline, surfactant-based cleaner—removes fatty acids, rapeseed and palm oils, CIP cleaner, wine industry
Lerapur® M-CIP	CIP-cleaner

Acidic cleaning agents – food industry

Leraclen® Acid Plus P	Phosphorus-based cleaning agent for cleaning the inside of tanks and polishing the exterior surfaces of silo lorries.
Leracid® KMS 10	Phosphoric and nitric acid-based cleaner, low-foaming and CIP-compatible, suitable for plate heat exchangers, evaporators, piping, separators, tanks, and other vessels in the wine and beverage industry, as well as silo trucks
Leracid® Tank Acid	Universal phosphoric acid-based cleaner for internal and external cleaning, silo trucks

Certifications

Produktname	NSF	Kosher	Halal

Lerapur® M-CIP	x	o	x
Leraclen® Tank Alkaline	x	x	x
Leraclen® Tank Acid	x	x	x
Leraclen® Acid Plus P	o	o	x

O = Declaration of Conformity

My passion lies in the development and optimisation of cleaning solutions. For many years, I have been involved in the technical advancement of tanker cleaning—from simple cleaning methods to highly automated, high-tech systems. Today, I draw on the experience and insights I've gained to provide my customers with the best possible support in meeting their unique challenges.

Björn Haupt

Cold-Process Disinfection

EFFECTIVENESS

// Are we doing the right things?

EFFICIENCY

// Are we doing the things right?

Effectiveness & efficiency

Thermal disinfection using steam

- ✓ Generally very effective at killing microorganisms, including pathogenic bacteria, viruses, and yeasts

- ✗ Extremely high energy consumption
- ✗ Time-consuming
- ✗ Cost-intensive

Cold-process chemical disinfection

- ✓ Chemical disinfection agents can kill a wide variety of microorganisms and ensure effective disinfection

- ✗ Costs for chemicals and residues
- ✗ Separate drying

Lerasept® Forte

High-performance, liquid, and stabilised disinfection agent based on peracetic acid – with a broad antimicrobial spectrum of activity.

Cold disinfection with benefits: Energy savings, safe disinfection, no product residues that could adhere due to high temperatures (steam), such as proteins.

TOP
SELLER

For more than 30 years, I have been developing cleaning solutions for tank trucks, IBCs, and industrial plants. Drawing on my experience, I help customers conduct a comprehensive analysis of their processes and select the right combination of methods, plant technology, and chemicals. This results in efficient solutions that reduce cleaning times, conserve resources, and make workflows safer and simpler. Together, we develop sustainable concepts that balance economic efficiency, environmental protection, and people's well-being.

Thomas Kittel

Cleaning of air and product piping in the Food Industry

Our TubeGuard concept: a multi-stage cleaning process

TubeGuard was developed to reliably remove caked-on product residues and microorganisms from product and air pipes, as well as fittings and valves, and to safely prevent cross-contamination.

TubeGuard combines certified and approved cleaning agents with a systematic process: for verifiably clean air pipes system that meet even the strictest hygiene requirements.

Lerapur® M-CIP	Strongly alkaline, non-foaming cleaner
Cleaner C 18	Odorless acidic lime remover
Lerasept® O	Mildly acidic, oxidising cleaning booster for alkaline cleaning solutions

Exterior Cleaning

With powerful and innovative cleaning concepts, we ensure efficient, gentle-on-materials, and cost-effective cleaning of trucks (tractor units, chassis). Our products are also suitable for cleaning the exteriors of tankers, tank containers, and tank wagons.

GlossTec® Truck Intensive	Alkaline gloss foam cleaner; brightens dull varnishes, effortlessly removes insects, road grime, road salt, and product residue
----------------------------------	---

Water Treatment / Wastewater Treatment

As one of Europe’s leading distributors, we offer a broad portfolio of water chemistry products – including custom-made applications and formulations. Our application engineers come directly to your site, assist with implementation, and conduct operational trials under real-world conditions.

Odour neutraliser	Leraclen® GN 4 Leratens® ABSORB
Polymers	Flocculants: Cationic and anionic copolymers available upon request and following consultation based on on-site wastewater testing
Flocculants	PAC, sodium aluminate, ferric chloride, ferric sulfate chloride, etc.
pH adjustment	Caustic soda solution, sulfuric acid, whitewash, hydrochloric acid, etc.
Defoamer	ST Form SF 1, Leratens® SLK, and other products for rapid foam suppression
Activated carbon	Various particle sizes and degrees of fineness for AOX and COD treatment
