

Ceramide Moisturizing Cream

M24 002

The versatile care formula for body, face and hands with an oil phase of 15% intensively moisturizes dry skin and supports the renewal of the skin's protective barrier. A **Ceramide Complex** of four essential ceramides strengthens the natural lipid barrier. The combination of **Panthenol** and **Ectoin** promotes long-term moisturization and supports a healthy skin microbiome. The creamy texture provides a rich feeling from the very first touch. Thanks to **Squalane**, **Ethylhexyl Stearate** and **Dicaprylyl Ether**, the cream is quickly absorbed and leaves the skin feeling light and supple. The fragrance-free formulation is particularly suitable for sensitive skin.
