

Environmental responsibility and policy

Our goal is to ensure that the technologies used are always used professionally, in compliance with environmental protection instructions (education, training), thereby reducing the amount of waste (non-hazardous and hazardous waste). Waste management is carried out in full compliance with Act CLXXXV of 2012 on waste and its implementing regulations. In order to reduce waste, we regularly review the technological software.

Other safety measures to reduce energy efficiency and pollution:

Our goal is to use the materials and energy necessary for the activity efficiently and to prevent accidents.

We ensure that the applicable laws and emission limits set by the authorities are complied with at all times.

Applied technology compliance with BAT (Best available technology) requirements:

Our goal is to ensure that the applied technologies meet the requirements of BAT in terms of cost and environmental resource saving. The equipment meets the current technical level (IPPC).

As stated in the individual Waste Management Plan, we regularly review the reduction of production waste through individual technological tests and maintain and modernize our equipment.

Environmental Policy

Our Goal:

We are committed to compliance with the ISO 14001 standard, setting goals, achieving them and reviewing them.

We provide a healthy and safe working environment for our employees. We strive to organize our operations in accordance with the rules of our company and the Hungarian laws regarding work, property and environmental protection.

We consider it important and do everything we can to continuously develop and improve our accident prevention system throughout our company.

We intend to organize and manage our company's operations in such a way as to ensure the safety, health and protection of our employees and the company's property, and to comply with environmental regulations in all respects.

In doing so, we consciously make a long-term commitment that requires the continuous development of our work, property and environmental protection system and procedures in order to meet the needs of both our employees and our partners and customers.

We believe it is important for our employees to know, understand and accept the goals and principles stated above. We expect everyone to perform their work in accordance with our environmental policy.

Environmental measures

Regular air pollutant emission measurements by a specialist company, evaluation of this and implementation of the necessary measures to reduce harmful emissions.

Continuous monitoring of material flows, reduction of waste resulting from technologies

Conducting environmental inspections (semi-annually) and annual training of interested employees.

Environmental developments

Continuous modernization of technology in order to increase efficiency, always taking into account the company's environmental protection goal.

Valid until revoked.
